Multi Agent Model

Text to Text

Image to Text

Step 1 : Need to attach the image in Chat Message
Step 2 : Configure the Agent Model separately for Text to Text & Image to Text
Step 3 : Execute the agent & validate
Step 4 : Memory need to validate

Load Memory: Retrieves previous chat history before the AI generates a response. If it's the first message, it may be empty.

Save Context: Saves the latest user message and AI response into memory for future conversations. [Doesn't mean it's the number of conversation that you made in chat]
