Home Assignment:
Build a Document Question Answering (Document QA) Agent

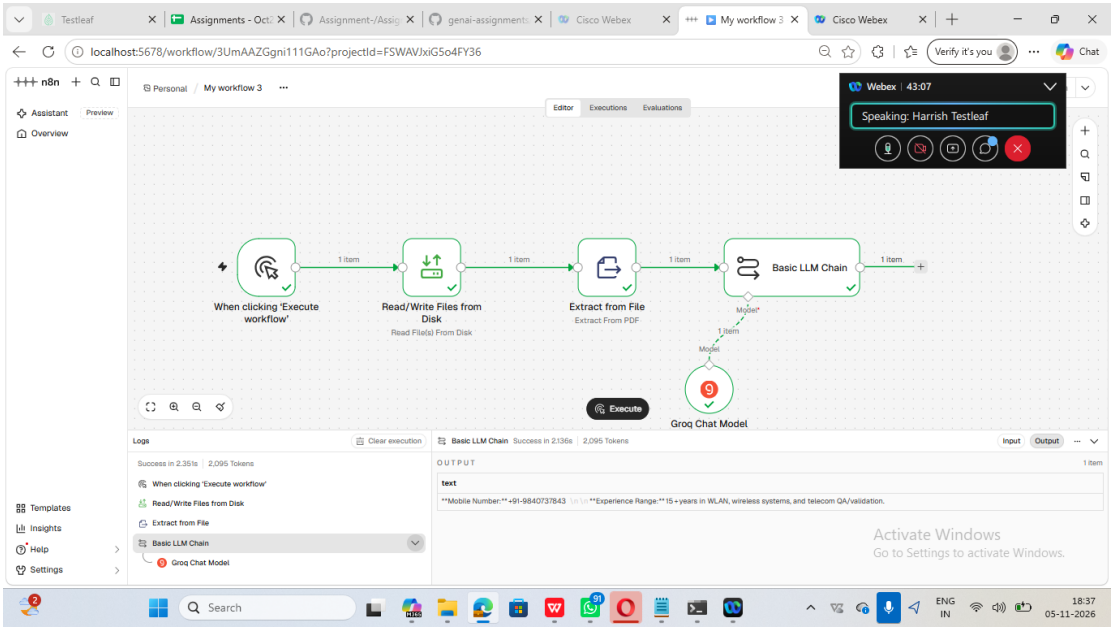

Develop an AI-powered Document QA agent that enables users to upload a document from their local system and ask questions based on its content. The agent should extract the document content, understand the user's query, and provide accurate answers using only the uploaded document as the source of information. If the requested information is not available in the document, the agent should respond appropriately instead of generating unsupported answers.

Expected Outcome: Users should be able to upload a document, ask multiple questions, and receive context-aware answers derived only from the uploaded document.

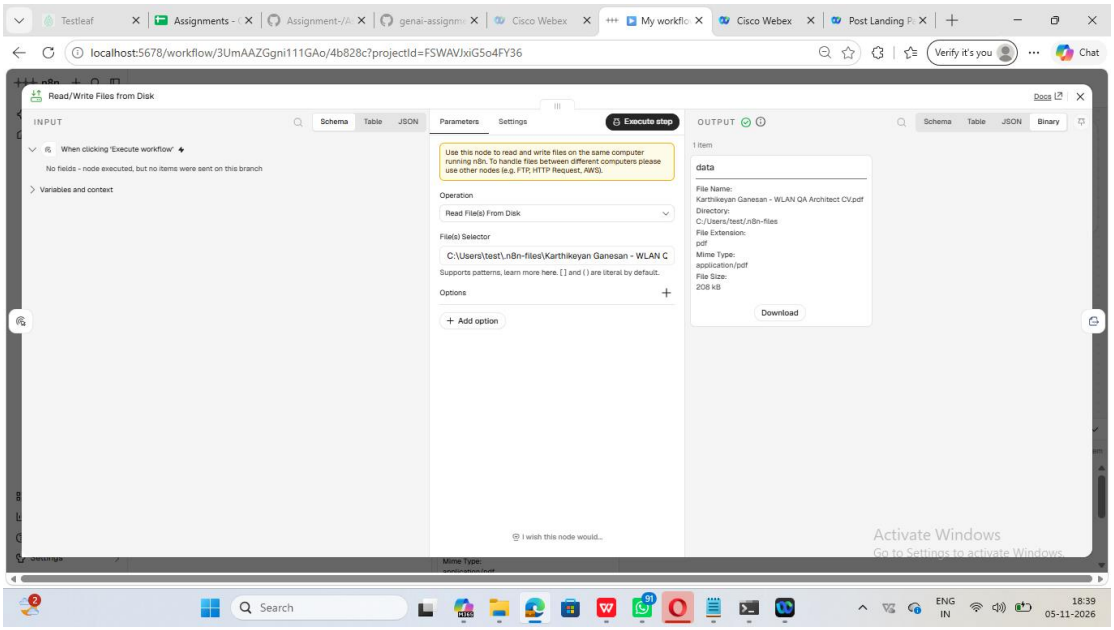

list of nodes :

1.Manual Trigger
2.Read /write files from disk
3.Extract from file
4.Basic LLM chain

Step 1 : C:\Users\test>n8n start
Step 2: Need to login n8n - http://localhost:5678/workflow/
Step 3: Need to install nodes - Manual Trigger, Read /write files from disk, Extract from file, Basic LLM chain
Step 4: Complete the configuration in all the nodes.

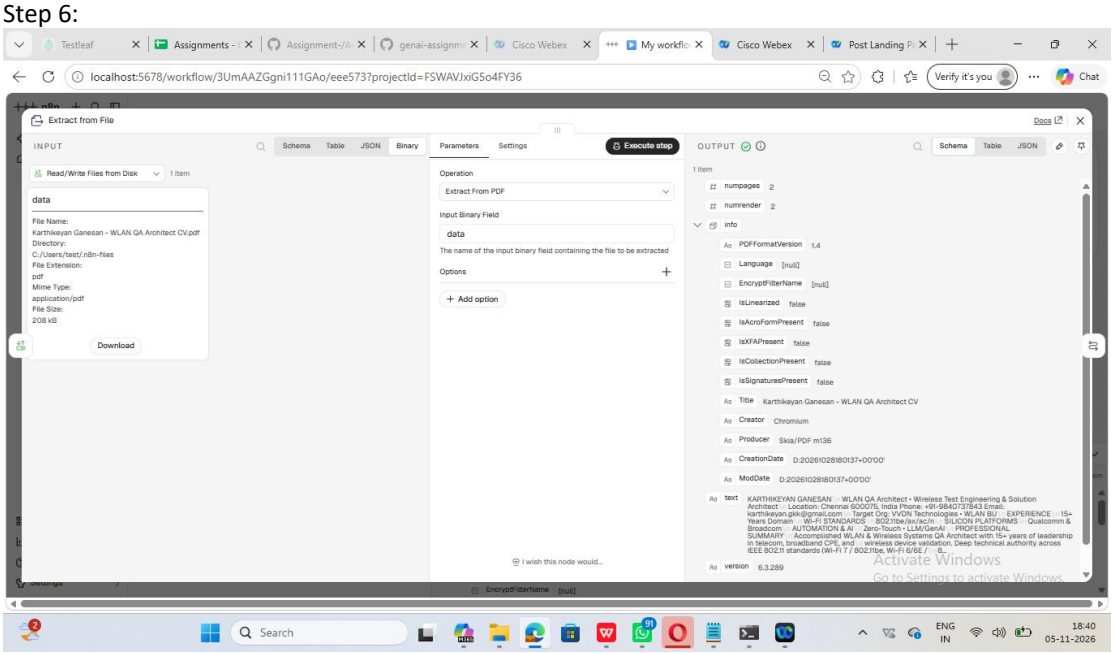

Step 5: Read / Write Files configuration

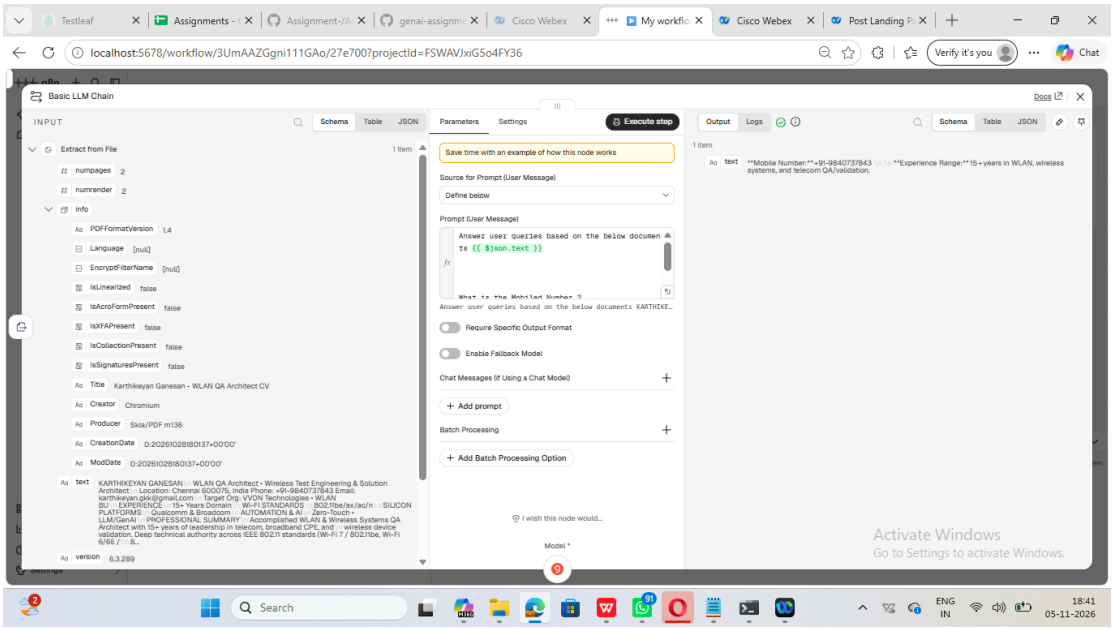

File selector : C:\Users\test\.n8n-files\Karthikeyan Ganesan - WLAN QA Architect CV.pdf

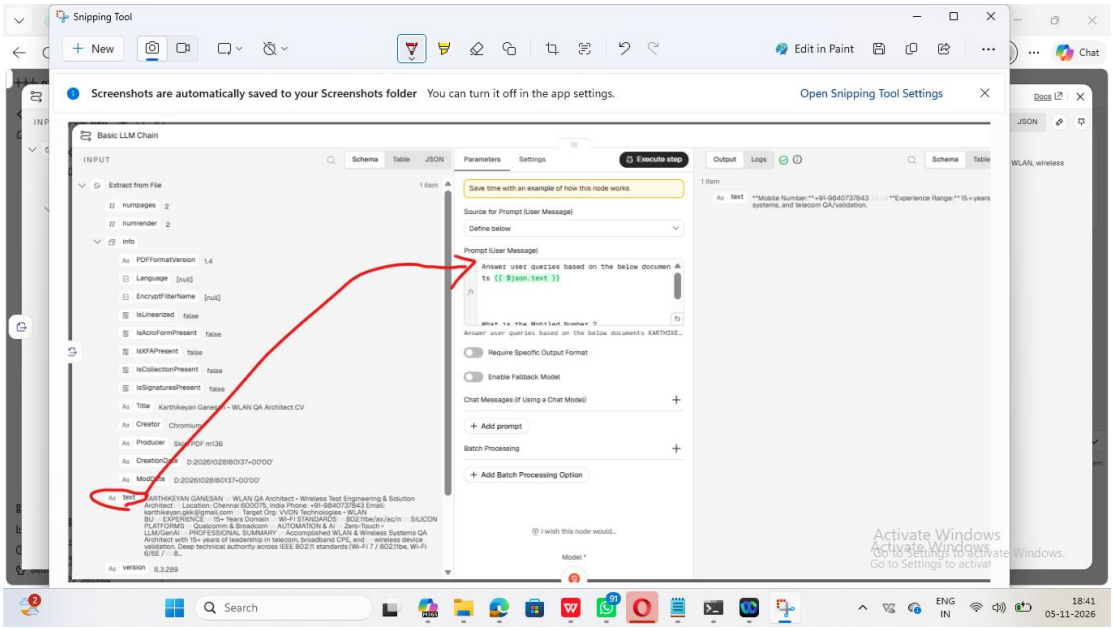

[Files should uploaded in C:\Users\test\]

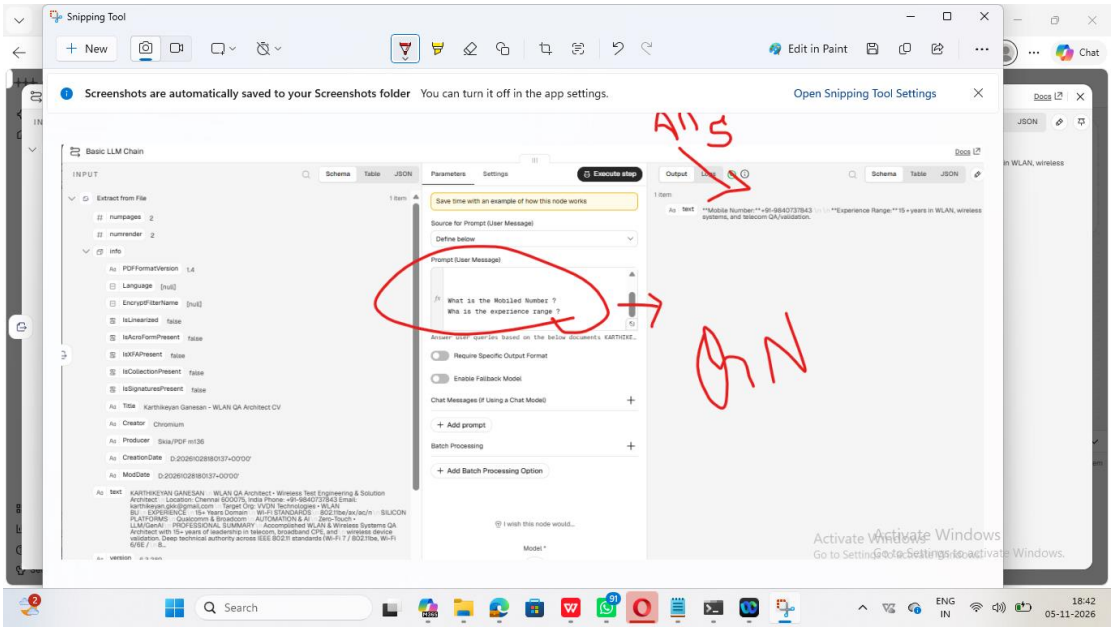

Step 6:

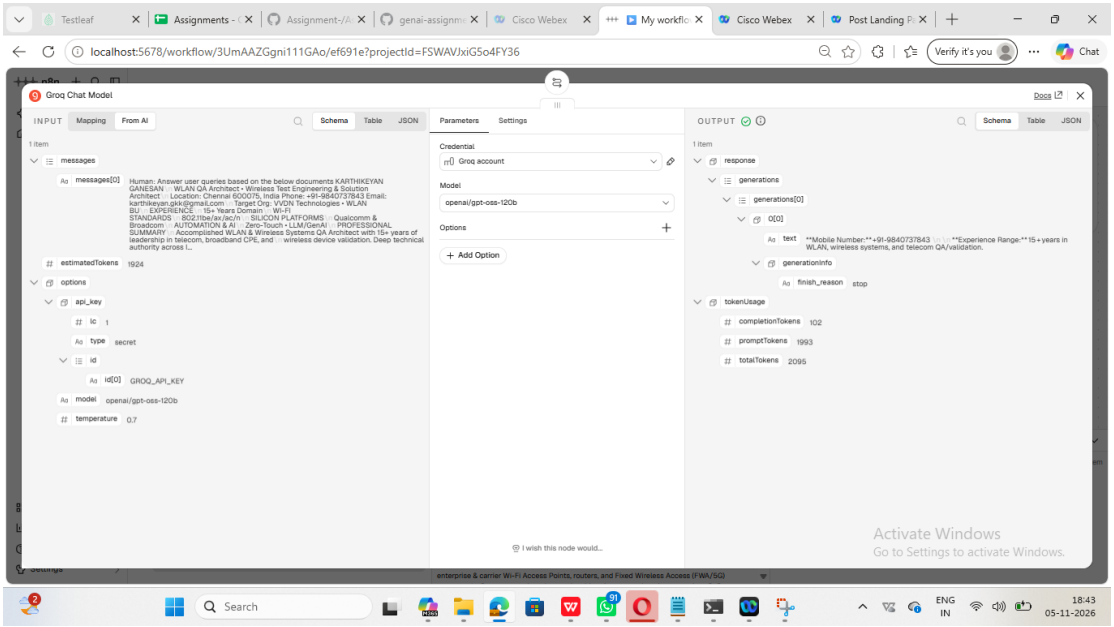

Step 7 : Basic LLM Configuration
Need to drag

Negative Scenario validation

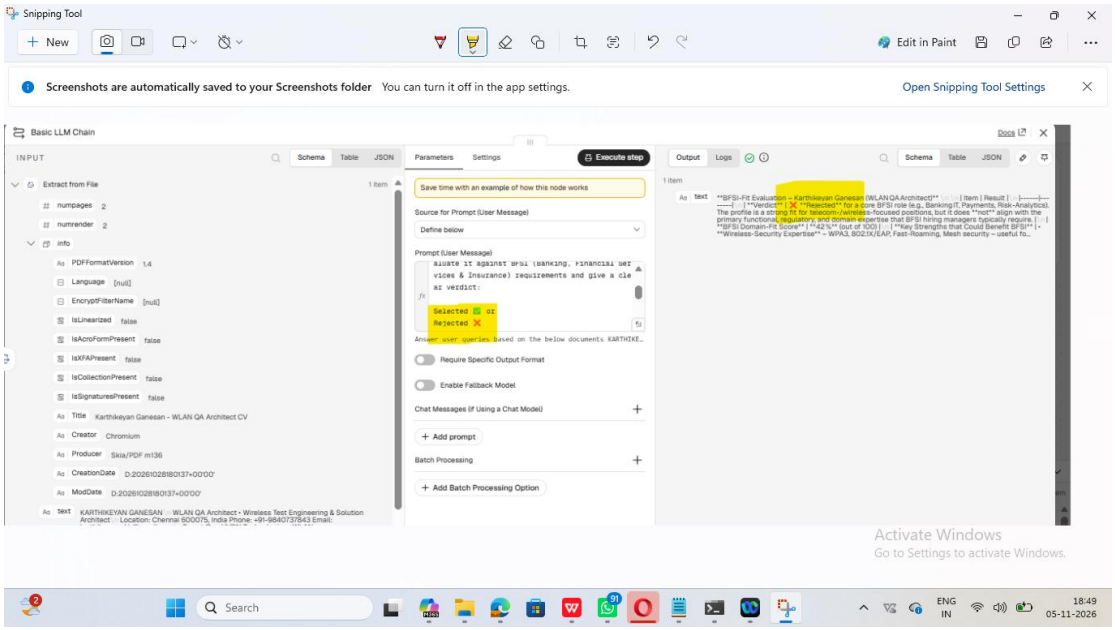

Evaluate the CV and update, it will be suitable for BFSI ?

It looks like the profile/resume is not attached. Please upload the CV/profile, and I can evaluate it against BFSI (Banking, Financial Services & Insurance) requirements and give a clear verdict:

- **Selected** ✅ or
- **Rejected** ❌

along with:

- BFSI domain fit score (%)
- Strengths matching BFSI
- Skill gaps
- Hiring manager perspective
- AI screening (ATS) assessment
